**What:** Are we headed for a dual standard – socialism for Wall Street and capitalism for Main Street? Are we already there yet? Is this new? What impact will all this have on us as Americans and as investors? What impact might this disturbing trend have on future generations and on freedom itself? Keith DeGreen has the answers.

The most cherished right of any citizen is self-governance. Only transparency of the entire election process will restore confidence in Arizona’s Election System. Senator Mesnard will update us on the forensic audit of the 2020 election and protection of future elections.
